SUMMARY

Software Engineer with 4+ years of experience creating web applications with cutting-edge engineering solutions for internal and external facing applications. Proven ability to lead projects to production. Extensive expertise in React as well as micro-services.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Elixir, Python, Ruby, C, C++

Frameworks: Next.js, Phoenix, Rails, Django, Flask, Express

Web Technologies: React, HTML/CSS, GraphQL, Feature Flags, Apollo Client, Node, Chakra UI, Sass, JWT, Bootstrap

Database Systems: PostgreSQL, AWS S3, AWS DynamoDB (noSQL)

EXPERIENCE

The RealReal

Senior Full Stack Engineer

Full Stack Engineer

Remote

Dec 2021 - Current

Nov 2020 - Dec 2021

- Lead the migration of multiple legacy seller pages to a new Next.js app which include the Seller Dashboard, Payment Preferences, and Seller Commissions.
- Helped implement Plaid Link integration to streamline the Direct Deposit experience where we achieved a record high of 57% of Direct Deposit payouts.
- Helped integrate our New Commission Structure project, which was estimated to \$12M in EBITA, by creating a handoff of our old legacy code to a new gRPC app with an extreme importance to maintain stable payouts.
- Lead the adoption of Next's Incremental Static Regeneration feature for Prismic (CMS) pages which improved Lighthouse Performance scores by 7 points on average.
- Help team growth by conducting interviews, mentoring an intern, and being active in our JAMstack Guild.

H.O.M.E.

Freelance Full Stack Engineer

Remote

April 2020 - Nov 2020

- Designed and developed a video course web application with both admin and user facing pages.
- Communicated with client on a weekly basis to review progress and create achievable deliverables.
- Implemented Redux-like state with React's Context and Reducer hooks to keep multiple video angles in sync.

Conventus

Full Stack Engineer

San Francisco, CA

May 2019 - June 2020

- Helped develop an internal loan management application used by the entire company with Django and React.
- Implemented a socket.io, Node micro-service to enable real-time loan editing which prevented hours of work lost from employees overwriting each others changes.
- Implemented a price forecast chart powered by HouseCanary and Zillow APIs to improve risk visibility.

JAKKS Pacific

Full Stack Developer Intern

Santa Monica, CA

May 2018 - Aug 2018

Participated in improving the company's intranet php website used by over 700 employees by being engaged in scrum meetings, creating solutions upon ticket submission, and executing automated Selenium frontend tests.

PROJECTS

EEG Processing Flask App (Capstone Project)

Jan 2019 - May 2019

- Built a Flask web application for researchers to upload EEG files (scans of electrical activity in the brain) and download the processed results.
- Created a backend for file pre-processing, optimized the existing Python processing script, and utilized AWS S3 Bucket for cloud storage.

EDUCATION

University of San Francisco

Bachelor of Science in Computer Science

San Francisco, CA

Aug 2015 - May 2019

- Cumulative GPA: 3.64; **Major GPA: 3.77 / 4.0**
- Relevant Courses: Data Structures & Algorithms, Software Development, Database Systems, Web Development, Parallel Programming, Computer Architecture, Operating Systems and Language Paradigms
